

MATERNUM ANTEPARTUM

- ▶ All antepartum CTG tracings gathered in one place
- ▶ Compatible with both local and remote
- ▶ CTG fetal monitorization
- ▶ Integrated with hospital information system
- ▶ Simplicity of use
- ▶ Customizable according to your needs

Pregnabit[®] Pro
CTG telemedicine system

What if... There was a solution to perform a safe follow-up of the pregnant woman, while she remains in the comfort of her home, improving her contact with the health unit?

MATERNUM ANTEPARTUM

All CTG tracings embedded in a single solution

CTG tracings of both local and remote fetal monitorings are gathered in one place. Any computer, tablet or smartphone inside the hospital can be used to check both live and archived monitorings. Convenience: Searching and comparing CTG tracings requires a lot less effort with the Maternum Antepartum solution.

Wallboard

| Digital wallboard with full information of every patient in every room, both local and remote, in real time

| The wallboard displays Omniview Sisporto alerts of all live fetal monitorings

Improved Patient Safety

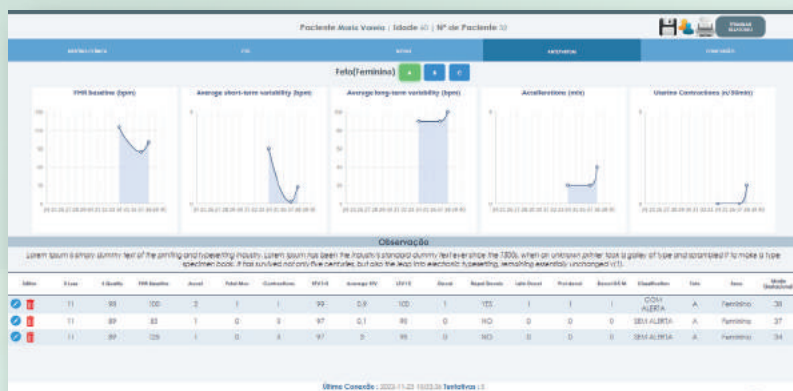

Displaying real time Omniview SisPorto alerts in Maternum Antepartum Digital Wallboard adds clinical information and eases decision making.

Antepartum Digital Report

For each patient, an Antepartum Digital Report is generated.

The report includes:

- ◆ All antepartum CTG tracings
- ◆ Statistics of Omniview SisPorto tracing analysis on all tracings
- ◆ Records of patient clinical history and risk factors
- ◆ Clinical staff annotations, interventions and conclusion

Pregnabit[®] Pro
CTG telemedicine system

What is Pregnabit Pro?

Pregnabit Pro is a medical device for telediagnosis that supports physicians and midwives who watch over a pregnancy. The CTG is of **the same quality** as one performed with a stationary cardiotocograph, subject to specialist's with recommendations for further management.

CE

It measures the following data

Fetal Heart Rate

Mother's Heart Rate

Uterine Contractions

Fetal Movement Event

CTG Home Solution

A pregnant patient in her **third trimester receives a Pregnabit Pro kit and is trained on how to use it by her medical caregiver**. The patient uses a Pregnabit Pro device to perform an examination as instructed by a medical professional, with a set frequency and at suggested times and situations.

Key BENEFITS of mobile CTG

For MEDICAL STAFF

- 24/7 monitoring of medium and high-risk pregnancies
- Real-time analysis - pre-screened by algorithms
- High quality recordings
- Quick decisions - reports available in less than 5 min after the test
- Online access to the examinations
- No coincidence between mother and fetal HR
